

FMFCU Scanner Setup/Install:

1. Install the Canon CR-L1 Driver and Ranger API here (2 separate downloads on Canon's web site):
<https://www.usa.canon.com/internet/portal/us/home/support/details/scanners/check-scanners/imageformula-cr-l1?subtab=downloads-drivers>
2. When the driver download is complete, a folder should open and you will need to select the Setup application. When download is complete, plug in scanner to computer and power on.
3. Once Driver and Ranger API are installed and the scanner is connected, login to FMFCU's Online Banking, tap "Menu" and then tap "Business AnytimeDeposit."
4. Upon loading for the first time, you will be asked to download the Ensenta Device Control.
5. After downloading is complete, the system will recognize the scanner (Canon CR-L1), and will be ready to start the first deposit.

A Canon CR-L1 manual is also available from Canon's web site here:
